

BILAWAL ULLAH SAMI

SUMMARY

Analytical and results-oriented Software Engineering student with hands-on experience developing scalable solutions and automating workflows. Skilled in full-stack development, data analysis, and AI-driven optimisation. Proven record in managing end-to-end systems, improving performance metrics, and delivering seamless user experiences. Passionate about building efficient, data-backed, and user-centric applications.

KEY ACHIEVEMENTS

 **Tech-Enabled Brand Systems**
Built a data-driven brand ecosystem by integrating automation, analytics, and AI tools across marketing and logistics.

 **AI-Driven Decision Making**
Used LLM to forecast ad performance, analyse keyword trends, and predict inventory gaps.

 **Technical Excellence Recognition**
Achieved #1 performance for five straight months for outstanding troubleshooting accuracy, speed, and client feedback scores.

[COVID Response](#)

- Handled 100+ daily wellness calls, ensuring care for COVID-positive patients
- Collected and logged data with 100% accuracy, supporting NHS response efforts

EDUCATION

Bachelor of Science in Software Engineering 09/2023 - Present
[Edge Hill Unniversity](#)

- Focus on Full-Stack Development, Software Testing, and Cloud Systems
- Coursework includes Data Structures, Agile Project Management, and DevOps
- Working on a capstone project: AI-powered Inventory Forecasting Tool for E-commerce

PROJECTS

PromptForge – AI Prompt Engineering Platform

- Built a web app that analyses user ideas and generates structured AI prompts for various creative and coding tasks.
- Used Next.js, OpenAI API, and Tailwind for a minimal, fluid interface and dynamic user interaction.

NoteSnap – AI Study Companion App

- Created an intelligent study app that turns notes into flashcards and quizzes using AI-based content analysis.
- Implemented with React Native, Firebase, and OpenAI API for real-time note processing, storage, and adaptive learning.
